The Power of Enactor's Innovations - Global Retail

How Enactor delivers superior
application performance

Part 3

What's in it for you?

Store Commerce - in the cloud

Deploy your whole store estate in the cloud. We support a full cloud architecture so you could put Estate Manager, Back-office, POS and Mobile POS all driven from the cloud with just client apps or browsers on the devices in-store. Amazing if you've a really strong network.

Maintain the solution more easily.

Reduce the cost of deployment.

Reduce the cost of hardware in-store (less power needed).

Be much more effective and cost-efficient in deploying and managing the solutions.

Docker, Kubernetes and SW

Over the last 3 years we have containerized our product and process with Docker containers. This has given us a huge boost in flexibility, scalability and efficiency in deployment in AWS, Azure and on-prem.

Streamline the delivery process and greatly reduce risks.

What's in it for you?

Lower the cost of ownership.

Be more agile in deployment.

Take on responsibility of the system more easily.

Deploy changes more quickly.

One Click Deployment Tool

We've built a set of deployment tools so that you can build and deploy any Enactor version in just a few clicks. Just choose your OS, version number, AWS or Azure then it deploys fully automatically.

International and Fiscalisation

Enactor has a fully international solution capable of delivering truly localized and translated configuration to any device or channel. We have also incorporated dedicated fiscal, team building compliant, solutions into our standard product, with 8 countries added in 2019 alone.

Reduce barriers to entry for new markets.

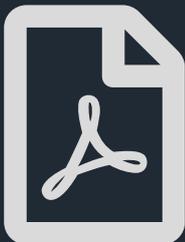

Eliminate costs and time in going into new and strategic countries.

Enactor has a different way.

We believe in inherent innovation, which can only come from changing the current model, enabling retailers to change business processes quickly as consumer demands change and new technologies emerge in support of the consumer experience.

Enactor is built using products and tools in a completely different way. We have put supporting rapid software change, ease of upgrades, knowledge transfer and self-sufficiency right at the heart of what we do for our customers. The world of modern retailing and commerce is extremely competitive; being reactive and innovative is more critical than ever and controlling needless costs on IT is a critical part of that.

So get in touch to find out how we can make those questions go away!
